

***Fused silica transmission grating technology offers unbeatable energy/power damage threshold combined with high-efficiency spectral performance***

As femtosecond laser systems advance to ever increasing energy levels, demands to the energy/power handling capabilities of pulse compression gratings increase. Ibsen manufactures 100% fused silica pulse compression gratings that offer unbeatable energy/power handling capacity, combined with high-efficiency, low wavefront distortion performance.

Pulse compression gratings from Ibsen build on Ibsen's world leading position in fused silica transmission gratings, utilizing state-of-the art interferometric patterning technologies and advanced reactive ion etching technology. Gratings are manufactured on custom/OEM basis, but an increasing number of gratings are stock available, such as the grating described in this product sheet.

## **Pulse Compression Grating**

**1812 l/mm for 760 nm**

**PCG-1812-760-971**

# 1812 l/mm for 760 nm

## PCG-1812-760-971

Benefits
Highest energy/power damage threshold
Environmentally and thermally stable
High diffraction efficiency
High tolerance to incidence angle
Low transmitted wavefront distortion

Parameter	Specification
Material	Fused silica and high-power, dielectric AR coating materials
Grating area	20 mm x 10 mm
Substrate size	30 mm x 25 mm x 1 mm
Grating resolution	1812 l/mm
Grating period	552.0 nm +/- 0.2 nm
Dispersion at 760 nm	0.143 deg/nm
Nominal wavelength	740 - 780 nm
Angle of incidence (AOI)	Littrow (43.5 deg)
Diffraction efficiency (TE)	>92%
Back-side AR coating	High power, dielectric AR coating applied
Production technology	2-beam Interferometry and Reactive Ion Etch, Class 10 cleanroom environment
Energy/power damage threshold	<a href="http://ibsen.com/products/transmission-gratings/high-power-gratings">http://ibsen.com/products/transmission-gratings/high-power-gratings</a>

## Typical Grating Performance

The above grating is an example of Ibsen's capabilities. Ibsen operates as grating partner for our customers, from being an integrated part of the grating and device / instrument design phase, to the manufacturing of prototypes, to volume manufacturing of OEM gratings.
